Experience

DealerMatix Technologies

Jan 2025 – Present

Software Engineer

Onsite | Chandigarh, Punjab

- Led end-to-end development of the **DealerMatix SFA (Sales Force Automation)** mobile app for **Android** and **iOS** using **React Native** and the **Salesforce Mobile SDK**; delivered scheme management, manual schemes, a tax calculator for dynamic pricing and accurate order totals, and **real-time GPS tracking** for field sales teams across **500+ active users**.
- Architected an **offline-first** React Native application from scratch using **Redux** and **Context API** for state management, **SmartStore** for local persistence, **Mobile Sync** for data synchronization, and **Salesforce Apex** integration; built **2 end-to-end business workflows** with reliable offline operation and data sync.
- Improved application performance by **30%** by implementing **pagination**, **lazy loading**, and polling, and by optimizing **SOQL** queries – reducing data load times and improving UI responsiveness across Android and iOS.
- Owned the complete **build, release, and deployment** lifecycle on the **Google Play Store** and **Apple App Store**, and provided ongoing production support through bug fixes and change requests (CRs).

Exposure: **JavaScript**, **React**, **React Native**, **Redux**, **Context API**, **Salesforce**, **Apex**, **SOQL**, **Mobile Sync**, **Android**, **iOS**, **Azure**

Technical Skills

Programming Languages: Java, JavaScript, SQL

Frontend & Mobile: React.js, React Native, Redux Toolkit, RTK Query, Redux Thunk, Context API, React Navigation, Axios, HTML5, CSS3, Tailwind CSS

Backend: Spring Boot, Spring Framework, Spring Security, Spring Data JPA, Hibernate (JPA), RESTful APIs, OAuth2

AI & LLM: Retrieval-Augmented Generation (RAG), Spring AI, OpenAI Embeddings, Vector Search, pgvector, Document Chunking, Streaming Responses (SSE)

Databases: MySQL

Cloud, Build & Tools: AWS, Docker, Git, GitHub, Gradle, Maven, Bazel, Postman

Core CS Fundamentals: Data Structures & Algorithms (DSA), Object-Oriented Programming (OOP), SOLID Principles, Design Patterns (Builder, Singleton, Factory)

Projects

Enterprise CRM Platform (Web & Mobile)

Sales, Procurement & Service Management System

- Developing a full-stack **Enterprise CRM** with a **React** web application, a **React Native** mobile app, and a **Java Spring Boot** backend exposing **RESTful APIs**.
- Implemented end-to-end business workflows across **Sales**, **Procurement**, and **Service** modules, translating stakeholder requirements into clear, data-driven application logic.
- Built **reusable UI components** and integrated mobile clients with CRM backend APIs.
- Maintained release quality through **unit testing**, managed deployments, and provided ongoing production support through bug fixes and change requests (CRs).

Exposure: **React**, **React Native**, **Java**, **Spring Boot**, **REST APIs**, **SQL**, **JavaScript**

DevPilot – AI-Powered Codebase Assistant (RAG)

Full-Stack AI Application

- Developed a **Retrieval-Augmented Generation (RAG)** application with **Spring Boot** and **Next.js** that lets developers query their public and private **GitHub** repositories through a chat interface.
- Implemented **GitHub OAuth2** authentication with **Spring Security**, using **HttpOnly** session cookies and encrypted access-token storage.
- Engineered an **asynchronous indexing pipeline** that filters, chunks, and embeds repository files into **PostgreSQL (pgvector)** using **OpenAI embeddings**, with live progress tracking.
- Built a **Spring AI** chat service with repository-scoped **vector search**, streaming responses over **Server-Sent Events (SSE)** with file-level citations.

Exposure: **Java**, **Spring Boot**, **Spring Security**, **Spring AI**, **Spring Data JPA**, **PostgreSQL**, **pgvector**, **Next.js**, **TypeScript**, **Docker**

Education

Sant Longowal Institute of Engineering and Technology

July 2021 – July 2025

Bachelor of Engineering in Computer Science and Engineering, CGPA: 8.9/10

Longowal, Punjab, India
