Summary

Software Engineer with 1.9+ years of experience shipping cross-platform mobile apps for 15000+ users at DealerMatix Technologies, from offline-first architecture to Play Store and App Store releases. Builds full-stack applications with Java, Spring Boot, Spring Security, Spring Data JPA, RESTful APIs, SQL, and React.js, and AI features with Spring AI and RAG. Raised app speed by **30%**, shipped **4** production releases, fixed **about 70** live issues, and directed a **4-member** team with second-level code reviews. Grounded in DSA, OOP, SOLID principles, and design patterns, with a focus on clean, testable backend code.

Experience

DealerMatix Technologies **Jan 2025 – Sep 2026**

Software Engineer *Onsite | Chandigarh, Punjab*

- Led development of the DealerMatix SFA app for Android and iOS with React Native and the Salesforce Mobile SDK, serving **15000+** field sales users.
- Delivered scheme management, manual schemes, a tax calculator, and live GPS tracking.
- Architected offline-first data handling with Redux, SmartStore, and Mobile Sync for **2** business workflows.
- Analyzed bottlenecks and improved performance by **30%** using pagination, lazy loading, and SOQL tuning.
- Owned releases, shipping **4** versions to Google Play and the App Store and resolving **about 70** bugs and **10+** CRs.
- Directed a **4-member** team on one project and performed second-level reviews of teammates' pull requests.

Exposure: JavaScript, React Native, Redux, Salesforce, Apex, SOQL, Git, Azure

Skills

Languages: Java, JavaScript, SQL
Backend: Spring Boot, Spring Security, Spring Data JPA, Hibernate, RESTful APIs, OAuth2
Frontend & Mobile: React.js,React Native, Redux Toolkit, RTK Query, Context API, Axios, HTML5, CSS3
Databases: MySQL, MongoDB, Redis
AI & LLM: RAG, Spring AI, OpenAI Embeddings, Vector Search, SSE
DevOps & Cloud: Docker, AWS, CI/CD (GitHub Actions)
Tools: Git, GitHub, Gradle, Maven, Postman, Unit Testing
CS Fundamentals: DSA, OOP, Computer Network, SOLID Principles, Design Patterns, Multithreading, Agile/Scrum

Projects

Enterprise CRM Platform (Web & Mobile) **Sales, Procurement & Service Management System**

- Developed a full-stack CRM with React.js (web), React Native (mobile), and a Java Spring Boot REST backend.
- Translated stakeholder requirements into **3** modules: Service Bay, Timesheet Allocation, and Bulk Order Processing.
- Built **10+** REST endpoints and reusable UI components, integrating the mobile client with those APIs.
- Implemented **15+** unit test classes with up to **82%** code coverage.

Exposure: Java, Spring Boot, REST APIs, SQL, React.js, React Native

DevPilot – AI Codebase Assistant (RAG) **Full-Stack AI Application**

- Created a RAG assistant with Spring Boot and Next.js that answers questions about GitHub repositories, secured with OAuth2 and Spring Security.
- Engineered an async pipeline that chunks and embeds repository files into PostgreSQL using OpenAI embeddings.
- Streamed Spring AI chat answers over Server-Sent Events (SSE) with vector search and file-level citations.

Exposure: Java, Spring Boot, Spring AI, PostgreSQL, Docker

Education

Sant Longowal Institute of Engineering and Technology **Jul 2021 – Jul 2025**

Bachelor of Engineering in Computer Science and Engineering, CGPA: 8.9/10 *Longowal, Punjab, India*
